GROOT SOFTWARE

YOUR VISION ,OUR FUTURE

LETTER OF RECOMENDATION

Date: 10-August-2025

To,
Vansh Sharma

It is my pleasure to recommend Vansh Sharma, who has successfully completed his Java Development Internship at Groot Software under my mentorship.

During the internship period from 25th June 2025 to 9th August 2025, spanning 45 days, Vansh worked closely with our development team on real-world projects focused on Java-based application development. He demonstrated a strong understanding of core and advanced Java programming concepts, including object-oriented programming, exception handling, JDBC, and basic GUI development. He also worked with tools such as Eclipse/IntelliJ IDEs, and gained experience in implementing Java solutions in structured development environments.

Vansh actively contributed to several key tasks, including:

- Writing clean and efficient Java code for backend logic
- Implementing object-oriented design principles in real projects
- Connecting Java applications with databases using JDBC
- Debugging and testing code for performance and correctness
- Participating in team discussions for feature development and improvements

I am confident that Vansh Sharma will be a valuable asset to any team working in Java development or related software engineering roles. I wish him all the best for his future endeavors.

Kind Regards,
Satnam Singh
